Figure 3 is a block diagram of a network architecture. The diagram shows a central cloud labeled "Network 320". Surrounding the network are several external entities: "Agents/Brokers 302", "Policyholders 304", "Reinsurers/Licensees 306", "Visitors 308", "Strategic Marketing Partners 310", "Content Providers 312", and "Suppliers 314". Each of these entities is represented by a computer monitor icon and has a bidirectional arrow connecting it to the central network. Below the network, there is a dashed box labeled "Company 340". Inside this box, there is a "Bank Lock Box 346" (represented by a safe icon) and a "Central Data Center 344" (represented by a server rack icon), connected by a bidirectional arrow. To the right of the central data center, within the same dashed box, is a "Web Portal 342" (represented by two server rack icons), also connected to the central data center by a bidirectional arrow. Outside the dashed box, to the right of the network, is a group of "Aligned Providers 330" (represented by a server rack and a monitor icon), connected to the network by a bidirectional arrow.
